

## Career Readiness Skill Activity

**Grade Range:** K-8<sup>th</sup>

**Time:** 30-45 min

**Synopsis:** Students increase student's understanding of career choices by building vocabulary. Students will identify features of particular professions by guessing which occupation their mentor is describing.

### **Materials:**

- List of professions
- Print profession cards as visuals for students to see.

### **Instructions:**

1. Tell your student about the profession

**Tip: Use different vocabulary depending on the age group.**

2. Then ask what job you were describing.

3. Because your student can see the card on the table, they should easily be able to identify the occupation you were talking about. **Tip: before you start the game, ask students to raise their hands before answering to keep the noise level down. After they guess, give students a high 5, or a special handshake, be encouraging.**

4. If there is time left. Ask them questions about which professions they would like to do when they grow up and why.
